

Renewable Energy Adoption Dashboard (1960–2015)

Global analysis of renewable energy trends, top-performing countries, and growth patterns

Global Renewable Energy Share Trend

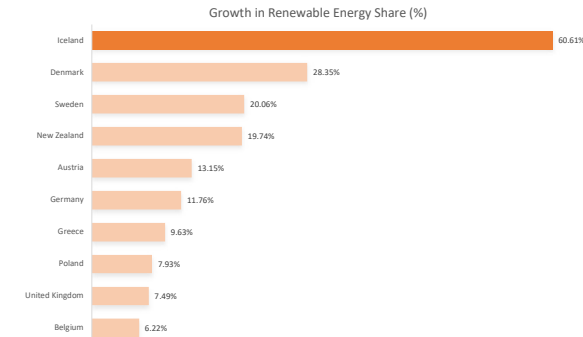

Top Countries by Average Renewable Share

Note: Some countries exceed 100% due to differences in energy accounting methodologies.

Top Countries by Renewable Growth

Note: European countries dominate renewable energy growth, indicating strong policy-driven transition efforts.

Key Insights

- Global renewable energy share increased significantly from the 1970s, stabilizing in recent decades.
- Paraguay leads with exceptionally high average renewable share, followed by several African countries.
- European countries dominate growth rankings, indicating strong policy-driven expansion.
- Some values exceed 100% due to differences in national energy accounting methodologies.
